

Sprint Retrospective Report

Sprint #:	1	Date:	20/05/2025
-----------	---	-------	------------

1. Start Doing:

- more detailed task breakdown during Sprint Planning
- respect naming conventions sooner, instead of refactoring later

2. Do More Of:

- proactive communication when we are blocked, instead of waiting for the daily scrum.
- design accurately before implementing
- deepen Unit Testing

3. Keep Doing:

- code reviews before merging branches.
- respect MVC architecture when adding new features

4. Do Less Of:

- having large group meetings when a smaller, focused group would be more effective
- underestimate our capability to perform tasks in a given time

5. Stop Doing:

- merging code without at least one peer review, even for small changes.
- commit and push when there are warnings
